

**STATE OF HAWAII  
STATE PROCUREMENT OFFICE**

**SPO Price List No. 00-16 (Statewide)**

Includes Change Nos. 1 through 9

Revised 3/4/05

**SWITCHED NETWORK SYSTEM**

(RFP-99-102-SW)

**January 18, 2000 to January 17, 2005**

**Executive Branch departments are responsible for notifying their telecom/DP coordinator  
that this price list is available.**

**TELECOM REQUESTS.** All purchases must be coordinated with the ICSD. Agencies are required to submit a Telecom Request (DAGS TR FORM 1).

**STATE'S COMMITMENT.** Agencies of the following purchasing jurisdictions are required to purchase from this price list:

- Executive Branch
- Judiciary

**EXCEPTION TO THE PRICE LIST.** When the use of the price list is not suited to an agency's purpose, the appropriate purchasing jurisdiction may grant an exception to purchase outside of the price list. For this purpose, Executive Branch agencies shall use SPO Form-5, "Request for Authorization to Purchase Outside of the Price List", available at the SPO Website, [www.spo.hawaii.gov](http://www.spo.hawaii.gov); select "Hawaii Procurement Code, Chapter 103D, HRS", click on "Forms for State agencies".

**POINT OF CONTACT.** Questions regarding the products or services listed, ordering, pricing, and status should be directed to the vendor.

Technical questions relating to the switched network system may be directed to Gwen Nakahara of the Telecommunications Services Branch, Information and Communication Services Division, Department of Accounting and General Services, telephone 586-1930, or facsimile 586-1962.

Procurement questions or complaints may be directed as follows:

Jurisdiction	Name	Telephone	Facsimile	E-mail
Executive	Marc Yamamoto	586-0569	586-0570	<a href="mailto:marc.yamamoto@hawaii.gov">marc.yamamoto@hawaii.gov</a>
Judiciary	Newton Sakamoto	538-5805	538-5802	<a href="mailto:Newton.t.sakamoto@courts.state.hi.us">Newton.t.sakamoto@courts.state.hi.us</a>

**USE OF PRICE LIST BY NONPROFIT ORGANIZATIONS.** Pursuant to Section 103D-804, Hawaii Revised Statutes (HRS), nonprofit organizations with current purchase of service contract(s) (Chapter 103F, HRS) have been invited to participate in the State Procurement Office's (SPO) price lists.

If a nonprofit organization (hereinafter called "nonprofit") wishes to purchase from a SPO price list, the nonprofit must obtain approval from each price list vendor, i.e., participation must be mutually agreed upon. A price list vendor may choose to deny participation by a nonprofit. Provided, however, if a nonprofit and price list vendor mutually agree to this arrangement, it is understood that the nonprofit will retain its right to purchase from other than a price list vendor.

**VENDOR:** Verizon Hawaii Inc.

**Submit purchase order to:**

P. O. Box 2200, Honolulu, Hawaii 96841  
Telephone: (808) 546-8736; Fax: (808) 546-8288  
Attention: Ms. Phyllis Morihara, HIA-16

**Submit remittance to:**

Verizon Hawaii Inc.  
P. O. Box 630044, Dallas, Texas 75263-0044

**Vendor Code:** 0000267378-04

**VENDOR CODE** for annotation on purchase orders is obtainable from the "Alphabetical Vendor Edit Table Report" available at your department's fiscal office. **Agencies are cautioned that the remittance address on an invoice may be different from the address of the vendor code annotated on the purchase order.** Therefore, when processing an invoice for payment be sure that the correct vendor code is used.

**PURCHASE ORDERS** must be received by the vendor no later than the expiration date of this price list. It is the agency's responsibility to send purchase orders to the vendor on a timely basis. The vendor is not obliged to accept any order received after the price list expiration date.

Purchases from this price list are for products needed by agencies during the contract period. Agencies may not issue purchase orders specifying delivery after the price list expiration date. This excludes those orders received by the vendor towards the end of the price list period for which delivery may extend beyond the price list expiration date. *"SPO PL No. 00-16" must be typed on purchase orders issued against this price list.*

**UNIT PRICES** include delivery to destination statewide; taxes, **including** the State General Excise Tax, currently 4%; and all other costs. Other costs include pricing for all components (hardware, software, engineering, design, installation and system implementation) required for a complete installation.

**CISCO CATALOG ITEMS**, as they relate to the Switched Network System, may be purchased as follows:

**Additional Equipment Purchase with Installation**

- Any Cisco Systems equipment that is not currently listed on the contracted price list, but is offered via a current or future published Cisco Systems price list and supported by the Contractor, may be purchased at 33.0% off Cisco Systems' List Price.
- The price is inclusive of shipping and tax.

Contractor will provide firm installation costs which covers delivery, installation, configuration and end-to-end testing, based on the final configuration at the contracted price of \$156.25 per hour plus 9.6% of the installed price (equipment and labor) for system implementation.

- Warranty: As specified in the warranty provision herein.

#### Additional Equipment Purchase without Installation (Drop Ship)

- Any Cisco Systems equipment that is not currently listed on the contracted price list, but is offered via a current or future published Cisco Systems price list, may be purchased at 33.0% off Cisco Systems' List Price.
- An equipment delivery charge of \$208.33 (tax included) will be applicable.
- Warranty will cover out-of-box failures only and must be returned to Cisco Systems within 30 days upon receipt of equipment. Upon receipt of the equipment, the user should immediately check to determine that the right equipment was sent and is operational. If found to be defective, the user should contact the Cisco Systems Toll Free Support number at 1-800-553-2447, Option #3, to report receipt of the defective product. The user should be prepared to provide the serial number and manufacture part number of the defective equipment.

After receipt of the replacement equipment, the user should immediately send the defective equipment back to Cisco Systems in the same box that the replacement equipment was received. Third-party billing information is normally provided by Cisco to eliminate shipping costs to the end-user. If the user fails to send defective equipment back to Cisco Systems within 14 days after the receipt of the replacement unit, Cisco's automatic tracking system will generate a bill to the end-user.

- Configuration support will not be provided by the Contractor on drop ship orders.
- If an incorrect item is received on a drop ship order, the user should contact their Contractor account representative for resolution.

#### Maintenance Options

- Second year maintenance by Contractor for Contractor installed equipment will be 10.86% of the Cisco Equipment List Price. For details of Contractor's maintenance coverage, refer to the maintenance requirements herein.
- Cisco's SMARTnet enhancements and maintenance support may be purchased through this contract for existing Cisco equipment or user installed equipment at the Cisco System's List Price.

The basic difference between the Contractor maintenance and SMARTnet is, Contractor maintenance provides on-site 24 hours a day by 7 days a week support during the contract period. SMARTnet provides remote enhancements and maintenance support with access to Cisco technical expertise, both on-line and via telephone.

- Embedded Cisco equipment that is not currently on a Contractor maintenance plan will be subject to a system certification at the stated \$156.25 per hour labor rate prior to obtaining Contractor maintenance.

#### Trade-In Program

- A trade-in program is also available whereby displaced non-Cisco equipment may be turned-in for credit applicable against the purchase of Cisco products.

**GENERAL INFORMATION.** The Switched Network System Price List was developed based on specific configurations from RFP-99-102-SW. State departments/agencies wishing to procure individual line item components from the price list, should first contact their respective GTE account manager, who will provide assistance and validation of the equipment being considered.

**INSTALLATION.** Installation of a new user access point must be coordinated with the ICSD. Installation as described below, shall be completed within thirty (30) business days from the date of the State PM's approval of Contractor's design plan. The Contractor in providing all work identified in the RFP shall include, at a minimum, the following:

1. Install and configure software on the equipment in order for it to be operational and functional as described herein.
2. Connect all electrical and passive connections for each equipment and any sub-assemblies to the equipment so that the system is operable and ready for the Acceptance Test.
3. Comply with National Electric Code (NEC), local building and safety codes, as applicable to installation of Telecommunications equipment.
4. Be responsible for and repair all damages to any building, support structure or equipment caused by its workers. The Contractor shall report to the State any damage to the property or equipment that may exist prior to installation.
5. Be responsible for determining and providing all necessary generic installation components required for the installation. Items such as mounting hardware, nuts, bolts, screws, cable wraps, etc. while not listed in the price list, are to be provided as required for the identified applications, and are assumed to be basic elements of the Switched Network System provided by the Contractor.
6. Upon completion of the work at each site, remove its tools, equipment and all rubbish from the premises and leave the premises clean and neat.

**ELECTRICAL REQUIREMENTS.** Electrical power for the equipment shall be provided by the State as identified by the Contractor. Power requirements shall adhere to the manufacturer's specifications. Requests for electrical consumption shall be reasonable. Contractor is responsible for providing proper surge protection and power extension cords installed in accordance with NEC, local building, and safety codes. The Contractor shall correct any violations during and after installation.

**ACCEPTANCE TESTS.** After installation and acceptance of normal system operations, the Contractor shall conduct acceptance tests for performance and reliability as defined by the

manufacturer's specifications, demonstrating acceptable performance over a thirty (30) day period. Acceptance tests shall begin within ten (10) days after Contractor notifies the State that the installation is completed.

Upon successful completion of the acceptance tests the State shall notify the Contractor in writing and authorize payments. Once the system has been accepted by the State, the one (1) year warranty shall commence.

## **MAINTENANCE**

1. The Contractor shall identify single point of failures and strategies to minimize the component failure.
2. The Contractor shall present test data verifying mean time between failures and equipment availability in existing operational networks.
3. Maintenance includes at no charge unlimited system software upgrades, including that for the Network Management System for the duration of the contract.
4. The Contractor has factory trained and certified maintenance personnel statewide. A certified back-up technician shall be available to the State if the assigned certified technician is not available. All neighbor island technicians have access to the Contractor's Oahu based Applications Engineers and Premium Customer Support Administrators as well as Contractor's NOC for second level escalation.
5. Maintenance personnel shall respond on an on-call basis 24 hours a day, 7 days a week. Maintenance personnel shall call back within thirty (30) minutes after the initial trouble call. If the State requires on-site assistance, the maintenance personnel shall respond on-site within two (2) hours of the initial trouble call, unless with the State's approval other arrangements have been made during the call back.
6. After two (2) hours of on-site investigation, the technician will advise his/her supervisor of the unresolved problem and establish a trouble report with the Contractor's National Operations Center (NOC) via Contractor's Technical Operations Center (TOC).
7. The local technician will work with Contractor's local and national product specialists to resolve the problem. If the problem remains unresolved after four (4) hours of on-site investigation, the technician will notify his/her Regional Service Manager and the assigned Account Manager. Contractor's NOC will establish a trouble report with the original equipment manufacturer.
8. If the problem remains unresolved for an additional two (2) hours, the Regional Service Manager will notify the General Manager of Branch Operations. The General Manager will escalate the problem to the manager of Contractor's NOC and reserves the right to escalate the problem within the original equipment manufacturer's marketing organization.
9. Should the equipment not be repairable within forty-eight (48) hours from the time of the on-site arrival or from the time ordered parts are received, the State will have the option of replacing the defective equipment.

10. The Contractor maintains several warehouses in the State for maintaining manufacture recommended sparing. In the event Contractor does not have the item in stock, Cisco maintains a depot in Sand Island.

The Contractor shall arrange to have the appropriate repair parts and tools arrive with the technician at the neighbor islands upon receiving a maintenance call. Only new standard parts or parts of equal quality shall be used in effecting repairs. In the event that a failing component or part is not available from the local parts inventory, the Contractor shall be required to airfreight the failing component or part to the repair site. For those situations where the equipment is not operational, airfreight of the failing component or part shall be on the next available commercial or freight flight unless with the State's approval other arrangements have been made.

For those situations where the equipment is operational but not fully functional, airfreight of the failing component or part shall be at the repair site within twenty-four (24) hours of the identification of the failing component or part unless with the State's approval other arrangements have been made.

The airfreight of components shall be provided at no cost to the State.

**QUALITY OF EQUIPMENT.** Equipment furnished under this Contract shall be new. All equipment supplied shall be labeled and/or embossed with the manufacturer's name, logo, serial number, and/or part number. It shall be free from defects that may render it unfit for use. Damaged or rejected items shall be immediately removed from the site and replaced with items of the quality required.

No payment, whether partial or final, shall be construed to be an acceptance of defective materials. The Contractor shall be liable for latent defects, fraud, or gross misrepresentations that amount to fraud.

The State may, at any time, by written order, stop the delivery of equipment not conforming. Such stop order shall not relieve the Contractor of the obligation to complete the contract within the contract time limits, nor shall it in any way terminate, cancel, or abrogate the contract or any part thereof. All items furnished under this Contract shall be Year 2000 compliant.

**DELIVERY REQUIREMENTS.** The Contractor shall deliver products in no more than six (6) weeks from time of order. Delivery shall be to the specified installation site. It shall include the transportation of all equipment to the site; uncrating; unpacking; removal of crating, packing, and skidding; and the positioning of the equipment for installation.

The Contractor shall be responsible for the risk of loss or damages that occur during delivery and installation of the equipment.

All loading, crating, and skidding used in the shipment of the equipment shall be the property of the Contractor and shall be removed by the Contractor from the State's premises immediately following the installation of equipment or as directed by the State.

**WARRANTY.** Contractor and its sub-contractor(s) shall warrant the equipment and work for a period of one (1) year from date of final acceptance. The Contractor, free of charge under the warranty, shall correct any residual equipment failures or faults found by the State after the

installation and acceptance due to labor practices. Warranty service shall comply with the Maintenance Requirements described herein.

**LIQUIDATED DAMAGES.** Liquidated damages are fixed at the sum of FIVE HUNDRED DOLLARS (\$500.00) per day for any violation of the Contractor in failing to perform in whole or in part any of its obligations hereunder.

**PRICE LIST AVAILABLE ON THE INTERNET.** The price list is available at the SPO website: [www.spo.hawaii.gov](http://www.spo.hawaii.gov). "Click" on Price List and Vendor List in either the Hawaii Public Procurement Code, Chapter 103D, HRS or the Awards menu.
